

P6130

Background Music - Amplifiers

A Monophonic amplifier of up to 8 w on a load of 2 Ohm. for connection to 4" passive loudspeakers. Direct connection for one loudspeaker, and connector for parallel connection of more loudspeakers. It is supplied as a separate unit to be directly attached to the loudspeaker's plastic support with the two screws and nuts included. This enables a variety of loudspeaker and power combinations (see attached table). The sound level of the amplifier can be controlled by the sensitivity adjustment potentiometer.

GENERAL FEATURES

TECHNICAL CHARACTERISTICS

Power:	8 W
Frequency Response:	75 Hz - 18 KHz
Sensitivity:	1,5 V
Mains Input:	16V DC
Maximum Consumption:	1 A
Standby Consumption:	54 mA
Dimensions:	83x43x24 mm
Weight:	40 g

INSTALLATION
